EDUCATION

Chandigarh University, Punjab

Bachelor's of Engineering in Computer Science

September 2021 – June 2025

Current GPA: 7.4/10.0

SKILLS & CERTIFICATIONS

Programming Languages: C/C++ (OOPs), Python, SQL

Technical Skills: Data Structures and Algorithms, JavaScript, HTML, CSS, MongoDB

Frameworks & Libraries: React.js, Node.js, Express.js

Soft Skills: Effective Communication, Conflict Resolution, Good Listener, Leadership

Tools & API's : Git (version Control), FireBase, Rest API

TRAINING'S

Blochain Developement MetaCrafters | *Solidity, Smart Contracts, Polygon*

June 2023 – August 2023

- Completed ETH PROOF: Learned Solidity, smart contracts, and Ethereum Virtual Machine (EVM).
- Achieved ETH + AVAX PROOF: Built DApps, integrated wallets, and explored Avalanche Layer 2.
- Certified in POLY PROOF: Mastered Polygon zkEVM, bridges, and zero-knowledge identity tools.

PROJECTS

RouteGenie - AI Trip Planner | *React, Gemini AI, Firebase & TailwindCSS.*

Jan. 2025 - Feb. 2025

- Programmed a full-stack AI-powered trip planner using React and Firebase, **reducing user planning time by 50% through intuitive UI** and AI-driven recommendations.
- Collaborated Gemini AI to generate personalized travel itineraries, **achieving 90% user satisfaction**.
- Embedded third-party Restful APIs for real-time hotel and activity data, improving **recommendation accuracy by 25%**.

Real-Time Stock Market | *Data Analysis, ML Algorithms, HTML, CSS, SQL, Python* December 2024 - January 2025

- Curated a Data-Driven web application to analyze real-time stock market trends, achieving a **95% uptime using robust API integration**.
- Analyzed stock price trends across 5+ years of historical data to identify patterns, boosting prediction insights.
- Integrated multiple stock market APIs, enabling real-time data **fetching with 98% accuracy** and seamless updates.

Bite Rush(Food Delivery Website) | *HTML, CSS, JS, ReactJS, NodeJS, MongoDB, Stripe*

Jan 2024 – Feb 2024

- Developed a fully functional food delivery website, enhancing user experience and order efficiency for seamless meal delivery.
- Designed a streamlined admin panel **featuring role-based access control**, this innovation **resulted in improved processing time by 30%**.
- Operated a user authentication system with JWT, **increasing platform security by 50%**.
- Combined a conversational **AI chatbot** to assist users with order placement, tracking, and FAQs, enhancing user experience.

ACHIEVEMENTS

Got 4th rank in trading competition | *StockGro*

February 2023

- Secured 4th rank** in a StockGro trading competition, **outperforming 26 candidates** with strategic portfolio management.

4* star coder in C++ | *Hackerrank*

August 2022

- Earned 4-star C++ rating on HackerRank, **solving 200+ problems with 90%+ accuracy**, ranking in the top 10% globally.

Solved 300+ DSA Problems | *Leetcode and Coding Ninjas*

September 2021

- Achieved recognition as a top performer by solving more than 200 complex coding problems on HackerRank; this experience led to developing efficient strategies that enhanced overall algorithmic thinking capabilities.
